WATERSHED CENTER

Greenways are linear parks that preserve undeveloped ribbons of natural habitat, usually through urban areas. Greenways typically follow stream corridors or abandoned railroad rights-of-way. Hard surfaced paths with minimal grades provides access for walkers, runners, bicyclists, in-line skaters, wheelchairs and baby strollers.

The **Ozark Greenways** linear parks have many benefits to our community. Greenways are good for the environment, good for the wildlife that depend on the streams, and good for people who drink water (that's all of us!).

Healthy Water

Greenways...

-  Provide habitat for wildlife and serve as islands of nature in urban areas
-  Reduce flood damage to the environment
-  Improve water quality in our community and for communities downstream

Healthy People

Greenways...

-  Promote family-oriented recreation, fitness and alternative transportation in a safe setting
-  Encourage fitness and wellness through exercise
-  Improve the water quality for our drinking water supply
-  Provide access for wildlife viewing opportunities
